ALUMINIUM PACKAGING

Designed specifically for baking and take away food especially those requiring direct reheating in an oven, these aluminium packaging are very economical and convenient to use. With optional lids to keep food warm and fresh, these containers are available in a wide variety of shapes and sizes to suit all your needs. Aluminium is not biodegradable and we encourage reusing these containers for organising small items at home from the kitchen to the garage and even at the work place. When disposing is the only option, collect these together with aluminium drink cans for recycling
